## CONFERENCE: SUSTAINABLE URBAN TRANSPORT

30<sup>TH</sup> AUGUST

PŁOCK, POLAND

This international conference is aimed at building knowledge and exchanging ideas about strategies for sustainable urban transport and mobility. In particular, examples of practical solutions implemented in some cities will be presented in the fields of clean fuels, traffic management, non-motorized mobility, high quality public transport and integration with other sectors. Possibilities for financing environmentally sustainable modes of transport will be discussed.

Following the event there will be two days of international training for cities (31/08/2010 – 01/09/2010) which will offer further opportunity for exchange of good practices and for building capacity for changes towards more sustainable urban transport in the countries of both Central and Eastern Europe and of Western Europe.
